

Mr. Markham:

My name is Jerry Nelson. I'm the Ammunition Accountable Officer at Fort Leonard Wood, MO. I have been in this position and worked with Mr Seth Strickland for the past four years. As you know Seth handles our hazardous waste. The high volume of training here generates a staggering amount of hazardous waste. Seth not only keep up with the rest of the post's waste but our as well. We call and Seth is here to service our needs. His rapid response and knowledge is the critical factor that keeps the Ammo Supply Point in compliance with State and Federal regulations. I have never heard a single complaint or negative comment come from Seth. In a time where customer service is virtually non-existent, Seth takes it to a higher level. He is a pure pleasure to work with and complete professional. The environment has always been a concern of mine and a source of interest. I truly appreciate Seth's knowledge of hazardous waste and the care he takes in the performance of his duties. Seth Strickland is not only a valuable asset to your company but to Fort Leonard Wood, the Army and the Nation. There's not much I can do for contract employees. I would like to recognize the importance of the support given our mission here and a job well done. I needed you to know how much we value Seth and the outstanding job he's doing.

A handwritten signature in black ink, appearing to read "Jerry Nelson", with a long horizontal flourish extending to the right.

V/R

Jerry Nelson  
Ammunition Accountable Officer  
Fort Leonard Wood, MO
